### NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (Chapter II of the Patent Cooperation Treaty) (PCT Rule 71.1)

Date of mailing  
(day/month/year) 1 August 2005 (01.08.2005)

Applicant's or agent's file reference

PCT 320

#### IMPORTANT NOTIFICATION

International application No.

PCT/KR 2004/000483

International filing date (day/month/year)

8 March 2004 (08.03.2004)

Priority Date (day/month/year)

28 March 2003 (28.03.2003)

Applicant

KOREA INSTITUTE OF ENERGY RESEARCH

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**  
  
The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).  
  
Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.  
  
For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.  
  
The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed invention is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/KR 2004/000483

**I. Basis of the report****1. With regard to the elements of the international application:\***

- ☐ the international application as originally filed
- ☒ the description:  
pages 1-19, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_.
- ☒ the claims:  
pages 20-21, as originally filed  
pages \_\_\_\_\_, as amended (together with any statement) under Article 19  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_.
- ☒ the drawings:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages 1-6, Figures 1-9, filed with the letter of 7 July 2005 (07.07.2005).
- ☐ the sequence listing part of the description:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_.

**2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.**

These elements were available or furnished to this Authority in the following language \_\_\_\_\_ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

**3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:**

- ☐ contained in the international application in printed form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

**4. ☐ The amendments have resulted in the cancellation of:**

- ☐ the description, pages \_\_\_\_\_.
- ☐ the claims, Nos. \_\_\_\_\_.
- ☐ the drawings, sheets/fig. \_\_\_\_\_.

**5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).\*\***

\* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as „originally filed“ and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

\*\* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/KR 2004/000483

## IV. Lack of unity of invention

1. In response to the invitation to restrict or pay additional fees the applicant has:
- ☐ restricted the claims.
  - ☐ paid additional fees.
  - ☐ paid additional fees under protest.
  - ☐ neither restricted nor paid additional fees.
2. ☐ This Authority found that the requirements of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirements of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is
- ☒ complied with.
  - ☐ not complied with for the following reasons:
4. Consequently, the following parts of the international application were the subject of international preliminary examination in establishing this opinion:
- ☒ all parts.
  - ☐ the parts relating to claims Nos. \_\_\_\_\_.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/KR 2004/000483

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement			
Novelty (N)	Claims	---	YES
	Claims	1-21	NO
Inventive step (IS)	Claims	---	YES
	Claims	1-21	NO
Industrial applicability (IA)	Claims	1-21	YES
	Claims	---	NO

## Citations and explanations (Rule 70.7)

We refer to the response to the written opinion dated 2005-01-26 and amendment under PCT Article 34(2) concerning the new Figures 1-9 in the letter from 07.10.2004.

The following documents have been cited in the Search Report (prepared by APO dated 12.05.2004):

D1: AT 406 870 B  
 D2: WO1995/002661 A2  
 D3: WO 1993/009212 A1  
 D4: AT 386 222 B  
 D5: GB 612 667 A  
 D6: US 5 116 546 A  
 D7: EP 0 523 767 A2  
 D8: EP 0 535 290 A1  
 D9: AT 394 374 B  
 D10: EP 0562 504 A2  
 D11: EP 127 104 A1

Documents D2-D4 and D6-D11 define the relevant general state of the art and are not considered to be particularly relevant.

A closer reconsideration of the cited documents given the following evaluation different from the indicating given in the search report. Claims 1-21 are met fully by the disclosures of the Documents D1 and D5.

Consequently all the features of the subject matters of claims 1-21 of the present application have already been described.

D1: discloses production of fatty acid alkyl esters substitute by transesterification of triglycerides with an alcohol in presence of basic catalyst(s) comprising:

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/KR 04/00483**Supplemental Box**

(To be used when the space in any of the preceding boxes is not sufficient)

Continuation of: Box V (page 1)

the mixture of triglyceride, alcohol and catalyst is converted to form a ester phase and a glycerine phase:

- (2) the phases are separated;
- (3) the ester phase is divided into two parts, (A- ester phase) and (B-ester phase);
- (4) part (A-ester phase) is purified to give pure fatty acid alkyl ester;
- (5) part B-esterphase is mixed with more triglyceride, alcohol and catalyst and converted to form a new ester phase and a new glycerine phase and
- (6) steps (2)-(5) repeated.

D5: relates to methods of production of fatty acid alkyl esters by pre-esterifying a free fatty acid, contained in oil/fat comprising reacting the oil/fat with methanol under acidic condition in the presence of an acidic alcoholysis catalyst to reduce the free fatty acid content and continuing the transesterifying reaction under alkaline conditions in the presence of an alkaline alcoholysis catalyst. (see page 2, lines 47-61 and claims 1-7 of the document D5).

However the subject matters of the present application are:

Claims 1, 3 and 10: method of producing bio diesel oil by transesterifying Oil/fat with alcohol in presence of alkyl ester,

Claim 4 and 15: the used oil/fat are vegetable oil/fat, animal oil/fat, waste frying oil, regenerated oil/fat and a mixture thereof),

Claims 5, 6, 16 and 17: the used alcohols are the group consisting of C1 to C10,

Claim 7 – 9 and 18-20: the used catalysts are basic or an acidic catalyst,

Claims 11-14 and 21: disclose a method of producing bio diesel comprising pre-estrification a free fatty acid, contained in oil/fat, with alcohol in a presence of an acidic catalyst; and transesterifying the pre-estrified oil/fat and alcohol in a presence of alkylester.

Documents D1 and D5 disclose essential features of a method of producing bio diesel oil by tranesesterification oil/fat (even pre-estrifying before tranesesterification) with short alcohol and basic catalyst in a presence of alkylester which form the subject matters by claims 1-21,

Compared with documents D1 and D5 cited in the search report the claims 1-21 of the present application are lacking of an inventive step and of novelty, because the method of production of bio diesel by transesterifying oil/fat (even pre-estrifying before tranesesterification) according to the claims 1-21 is comparable with the methods described in the mentioned documents D1 and D5.

Accordingly, the subject matters of the application are not new and do not involve an inventive step.

The industrial applicability of the present application is obvious.
